Technical reports
In its section Informes técnicos / Technical reports, EPI publishes on request technical reports about companies, products and services, with a layout similar to the peer reviewed articles but without an abstract and keywords (so, they are not indexed in databases). The raw material, as well as access passwords to the products if necessary, are supplied by the companies, and the report writing is performed by EPI's specialized staff, who will eliminate possible trade jargon and present the themes in professional but accessible language.
These reports are a type of intermediate text between scientific articles and advertisements, ideal for explaining such things as how services are developed, how a company operates, benefits of the information products, case studies, etc.
At the request of the advertiser, the EPI editors can write an introduction with background explanations and the scientific-technical foundations that support or commend the products or services presented.
Cost: 420 € per page.

Payments
• The advertiser will be billed after the publication of the ad, banner or report. Payment can be made by bank transfer, credit card, bank draft, and PayPal.
